## Performant & GDPR compliant

### Online meetings with alfaview – stable, secure, scalable

Teams stay connected with alfaview – no matter where they are working from. Whether working from home, on the move or at the office: Communicate in real time, with crystal clear image and sound quality – in small groups or with more than 500 people at the same time.

Create space for exchange, team spirit and productive meetings with alfaview – without compromising on data protection and user-friendliness.

Easy  
and intuitive to use

Virtual rooms –  
open 24/7

Online meetings  
with more than 500 participants

Participants see each other –  
live and in real time

## Your digital communication

### Personalized room concept

Whether company, university or event organizer – design your digital environment according to your needs with alfaview. Create virtual meeting rooms, offices, classrooms and lecture halls to fit your specific requirements.

Switch from room to room with one click – as easy as opening a door. Your rooms are available for you and your teams 24/7.

### Breakout rooms

You have up to 50 breakout rooms available in each alfaview room – ideal for focused small groups, workshops or spontaneous networking. Participants can flexibly divide up into different rooms and work, discuss or exchange ideas in parallel.

Give the rooms unique names – for example “Controlling”, “Team meeting” or “Coffee break” – to create a clear structure and orientation for your participants.

## Features at a glance

### Availability for all platforms

Use alfaview on all standard operating systems: Windows, macOS, Linux, iOS, iPadOS, Android or via web browser.

### Screen sharing with audio

Share your entire screen, selected applications or sections. alfaview allows any number of users to transmit their screen at the same time.

### Chat for a quick exchange

Exchange ideas with other participants in the online meeting in the group chat or in personal short messages.

### Live transcription with EML technology

What is spoken is transcribed in real time in the sidebar. This makes your online meetings accessible and provides optimal documentation. This transcript can be saved and shared with all participants.

### Second camera for more perspectives

Use the second camera to share another perspective in addition to your video image. Whiteboards, technical illustrations or prototypes can then be visualized on a large scale.

### Gallery and speaker view

In the speaker view, the focus automatically shifts to the person who is currently speaking – their video image is enlarged. For a comprehensive overview, switch to the gallery view and see all participants at the same time.

### Invitation links for guests

Invite guests to your online meeting with a personalized guest link or a public group link. Your guests do not need their own alfaview account.

### Seamlessly integrated into Outlook

Create alfaview meetings in a new or existing calendar entry directly in your Outlook calendar.

### Fast and personal support

The alfaview team is there for you by phone, through the contact form, or via email. You can find additional resources in the Support Center.

### Easy integration via API

Integrate alfaview easily into your existing corporate infrastructure with our API.

# alfaview

## Work together

### Toolbox

Integrate external tools such as file sharing, project management or scheduling systems directly into alfaview. You can also conveniently link in-house resources such as your company's intranet.

### Whiteboard

Use the digital whiteboard to develop ideas, outline processes or structure content together in real time.

### Voting and polling tool

Start anonymous polls, quick votes or allow participants to give feedback via star rating with just a few clicks.

## Accessible and inclusive

### Screen reader support

Visually impaired users receive audio notifications about events in the room.

### Keyboard navigation

Operate alfaview completely without a mouse – quickly, efficiently and intuitively using the keyboard.

### Accessible design

An accessible design with high color contrast ensures better readability and facilitates orientation.

### Scalable font size

Customize the font size of the interface and chat for more reading comfort and accessibility.

### Keyboard shortcuts

User-friendly shortcuts facilitate interaction with alfaview and enable efficient control of central features.

### Sign language interpreter

The VIP feature allows sign language interpreters to be highlighted prominently in a large video tile.

# alfaview

## Successful events

### Waiting room

Control when participants may enter the room. Allow either individual participants to enter one after the other or all at the same time.

### Moderator controls

Flexibly assign moderator rights to as many people as you need. These users have additional features at their disposal to manage the meeting.

### VIP highlighting

Highlight important speakers: With one click, the video image of this person is displayed in a larger tile.

You can also highlight several people at the same time.

### Attendance report

Would you like to know who attended your event? Create an attendance report going back up to 7 days.

### Our team right there with you

The alfaview team supports you in the planning, organization and implementation of your digital event. We work with you to design a needs-specific room structure that fits your format perfectly.

## Multilingual conversations

### Digital interpreter

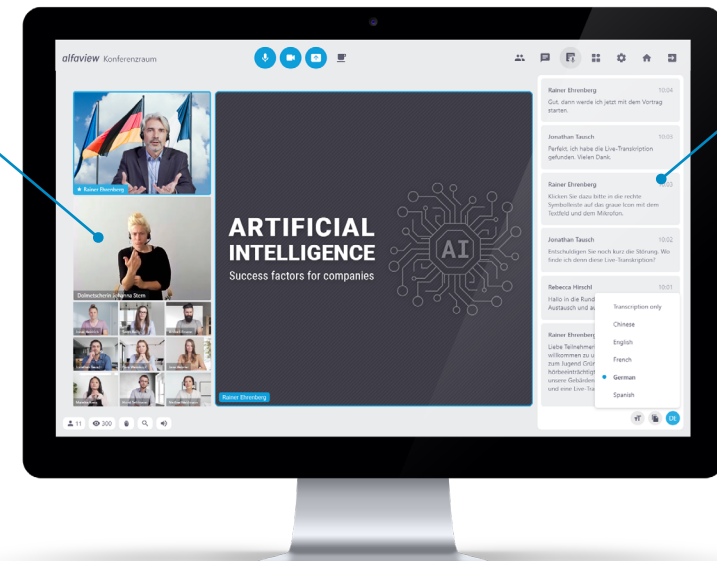

The digital interpreter allows you and your participants to communicate with each other, even if you speak different languages.

### Simultaneous interpreting for your meeting

Using a second audio track, the spoken word can be interpreted live and in real time into any language by simultaneous interpreters – both directly and via relay interpreting.

### Simultaneous interpreter

## Success Stories

” The alfaview video conferencing solution offers unique face-to-face conferencing and training, so we, as a company, have decided to use alfaview for our Education Division as well. Our clientele benefits from a professional learning environment in alfaview that produces a high level of learning success. And best of all, alfaview was developed in Germany and is GDPR compliant. “

Timo Schütte, **Global Vice President Delivery Education, SAP Knowledge and Education**

” We usually gather in a single location of the globe to discuss several aspects of life all around our planet. As the pandemic made this impossible, alfaview allowed us to successfully reverse our point of view, focusing on a specific instrument in space from all around the world instead. “

Daniele Cerra, **Research Fellow, German Aerospace Center**
